DEPUTY SUPERINTENDENTS,	
JOHN MIRKEL,	HOWARD PERKINS.

APOTHECARY,	PRISON AGENT,
BENJ. F. BUTCHER, M. D.	WILLIAM J. MULLEN.

REPORT.

IN accordance with the requirement of the Act of Assembly, of 24th February, 1847, the Board of Inspectors of the Philadelphia County Prison herewith submits its Twenty-third Annual Report to the Legislature.

During the past year, the Board has to regret the retirement of one of its oldest and most esteemed members, the venerable Isaac B. Garrigues, who, after a faithful and efficient service of thirteen years in this Department, declined a re-appointment in July last. The vacancy thus occasioned was acceptably filled by the appointment of Edward H. Trotter, Esq. With this exception, the Board remains constituted as at the date of the last Report; and, while the natural mutations incident to the period of fourteen years, which has elapsed since the Board was re-organized, in 1856, under appointments from the Courts, have left but two of the Inspectors originally appointed at that time, yet the vacancies thus made have been invariably owing to the death or resignation of incumbents. The appointing power has steadily ignored party politics in the selection of Inspectors, and the Board has endeavored also to exclude them from the government of the Prison. It may be fairly

claimed that not only economy in disbursements but efficiency in discipline have been thereby promoted. The successful administration of the Prison demands special training and experience from those to whose hands it is entrusted, and is certainly incompatible with the frequent changes to which political bodies are exposed.

The usual statistical tables are appended to the Report, from which it appears: That the whole number of commitments for the year 1869, was 18,305, against 17,620 for 1868, an increase of 685. This increase, however, is only in the number of commitments; the number of persons actually committed being less than those of last year. This apparent increase has been the result of a change in the character of the commitments. It was till lately the practice of the committing magistrates to include in the charge of drunkenness also *disorderly conduct*, by which offenders were committed to prison for a period of thirty days, to be held for the whole or a part of this sentence, at the discretion of the Inspectors. Vagrants of this class are now committed for *intoxication* only, for a period of twenty-four hours, and not unfrequently return half a dozen times during a month. Also, under a recent construction of the law, the power formerly exercised by the Inspectors, of discharging cases of "breach of the peace," has been abandoned. The committing magistrates have much increased commitments for this charge, retaining control of them in their own hands, and usually discharging them by arrangement after a few days, with the result of repeated recom-

mitments of the same offenders. It may be that a more exact compliance with the precise letter of the law now obtains, but the old practice was attended with better results. The Board feels, however, that so long as it fails to secure, on the part of the committing magistrates of our city, hearty and earnest co-operation in efforts to improve the criminal department, little real good can be accomplished by attempts within the Prison. The great and foremost evil in the criminal department of Philadelphia, is the system of police magistracy ; and no reform is so much needed as a change, at least in the mode of compensation of our committing magistrates. So long as their receipts are directly dependent upon and swollen by what must be stated to be simply a traffic in the manipulation of petty crime, it is idle to anticipate radical improvement in the treatment of this class of criminals. It is difficult to believe that such a system of magistracy can be tolerated in a city like Philadelphia, and that her citizens can sit quietly under so great a reproach. If our police magistrates were removed from the sphere of politics, by a change in the mode of selection ; if they held their offices by a good behavior tenure ; were required to be learned in the law, and were compensated by adequate, fixed salaries, in place of fees, a reform would be accomplished, the effects of which upon social improvement can scarcely be estimated.

The commitments for 1869 show a small decrease (270) compared with those for 1867, which were 18,575 ; those for 1866 reached 19,468. In 1860, the year preceding the

war, the commitments were 20,801. For the first half of the year 1869, from January 1st to July 1st, the commitments were 8,947; for the second half of the year, from July 1st, 1869, to January 1st, 1870, they were 9,358. This excess in the commitments for the second over the first half of the year, is usual: thus, in 1868, the commitments from January 1st to July 1st, were 8,032; from July 1st, 1868, to January 1st, 1869, they were 9,588.

Of the commitments for the past year, there were black males, 1,283, against 979 for 1868, and 1025 for 1867; of black females, 574, against 494 for 1868, and 570 for 1867. There were white males, 12,228, against 12,096 for 1868, and 12,361 for 1867, and 13,053 for 1866. The number of white females for 1869 was 4,220, a slight increase over those for 1868, 4,051, but a marked diminution over those for 1867, which reached 4,619. It is to be borne in mind, too, that while the number of commitments was more than for last year, the number of females committed was less. We have thus the experience of another year confirmatory of the good results of the increased accommodation for female prisoners, which was obtained by the transfer of the old Debtors' Apartment, two years since, to the Female Department of the prison. The separation of female prisoners, which was thus secured, and the greater facilities for the enforcement of prison rules and discipline, which were made attainable, have resulted in a marked diminution of vagrancy and crime in the female population of our city. Nor has the sanitary improvement in the Female Depart-

ment of the Prison been less conspicuous ; the cases reported to the Physician for treatment in this Department, for the past year, having been only 1775, more than a thousand less than the sick list for 1867. These results show the expenditure required in the extension of the Female Department to have been a true economy, and strongly support the more weighty moral arguments which are urged in favor of an extension of the more important and over-crowded Male Department of the Prison.

The Board would here repeat the views expressed in the last Report, upon the subject of an extension of the Prison, and again call the attention of the Legislature to the incapacity of the Prison for the proper confinement and employment of its large male population. In every aspect, sanitary, moral and economical, the injurious effects of its over-crowded condition are manifest. The results of improved accommodation in the Female Department, previously cited, have shown that the growth of crime and vagrancy is directly stimulated by the undue congregation of prisoners. It can scarcely be doubted that the collection of a number of prisoners in a single cell soon reduces all to the moral level of the worst prisoner ; and the unceasing intercourse which results from the original construction of the Prison with a view to the Separate System, fosters the moral contagion more actively than in prisons not designed for this system. The Separate System, once the especial pride of Pennsylvania, has been long abandoned in every department of the Prison, and even in the convict corridors, two,

three, and even four prisoners are placed together in a single cell. The Board feels that this subject can be no longer overlooked, and that either the extension of the convict blocks, or the construction of a new Prison has become a necessity. The establishment of a House of Correction, however desirable, would not relieve the crowded state of the convict cells. And the Board feels confirmed in the opinion, expressed in many previous Reports, that a House of Correction, for vagrants and drunkards, should constitute a Department of the Prison. Its construction might go hand in hand with the extension of the Prison, and would be thus economized; while its future connection with the management of the Prison would obviate the unnecessary multiplication of officials, and would facilitate the working of two co-ordinate branches of the same service. The Board expressed the opinion in the two last Reports, that the lot known as the Parade Ground, contiguous to the Prison, would be a very desirable location for these purposes, obviating, too, the large outlay necessary for the purchase of any other suitable ground. After a full consideration of the subject by the Prison Committee of Councils, in conference with the Board, that body has united in recommending an extension of the Prison on the Parade Ground, and has requested from the Legislature an enabling act for the purpose, which is respectfully and earnestly asked also by this Board.

Of the commitments to the Prison during the past year, about the usual proportion may be assigned to intempe-

rance, as either a direct or indirect cause. The actual charges in the commitments will be found to vary somewhat from those of last year, for reasons already mentioned. There were for *intoxication*, 3,546, against 2,025 for 1868; for *vagrancy*, 1,248, against 1,093 for 1868; for *assault and battery*, 1,687, against 1,462 for 1868; for *disorderly conduct and breach of the peace*, 7,360, against 8,132 for 1868; for *assault with intent to kill*, 146, against 121 for 1868. Of the entire number of commitments, 18,305, 13,987, or more than three-fourths, are thus traceable to intemperance; for, with scarcely an exception, in the cases enumerated, drunkenness is an accompaniment of the special act for which the commitment is made. Without assuming that these offences are wholly attributable to intemperance (for crime exists and prisons are filled in countries where drunkenness is comparatively uncommon), we may fairly urge that the unbridled multiplication of temptations to crime in the unrestrained sale of alcoholic narcotics, in our city, is a fearful evil. The existing license law is an unmitigated nuisance, and some modification of it may be most reasonably asked of the Legislature.

Of the prisoners committed for trial during the past year, 11,203, 8,750 were discharged by the committing magistrates, and in the cases of 580, the bills of indictment were ignored by the Grand Jury. These figures show a larger number of commitments and discharges by the magistrates than for the past year, owing to the breach of peace cases being retained exclusively in the hands of the magistrates.

The figures, however, tell the old story, that nearly two-thirds of the whole number committed were discharged without being brought to trial—involving a fearful catalogue of commitments for unnecessary and trivial causes, and doubtless, too, a scarcely less startling aggregate of oppression and persecution. Another argument is thus presented in favor of a change of the administration of criminal justice among us, which is only too often an engine of extortion and malice. Much of the duty of the Prison Agent is devoted to the relief of cases of unnecessary and oppressive commitments. During the past year, 3,895 prisoners were released through the interference of the Prison Agent. The whole number released through the agency of this officer, during a period of sixteen years, has been 25,687.

The duties of the Prison Agent have also extended to the care of prisoners after discharge from the Prison, either without trial, or after the expiration of their sentences. He has provided them with small sums of money, railroad tickets, and clothing, and in many cases has been of material assistance by timely advice as to their future course.

During the past year, the Board adopted the following rules for the government of the Prison, with reference to admissions and discharges. Uncertainty on some points having existed, and a want of uniformity of action on others having prevailed, it was deemed advisable to bring the instructions of the Prison officials as closely as possible in con-

formity to the precise letter of the law. These rules it is deemed proper to embody in this Report:

1. "No person shall be received into this Prison by virtue of any instrument in the nature of a 'Commitment,' wherein the offence charged shall not be particularly set forth and described, such as 'Homicide, in causing the death of —,' 'Larceny, in taking goods, the property of —,' 'Breach of the Peace, by abusing or threatening —'; and in this same manner as to all felonies and misdemeanors.

2. "No person sought to be imprisoned for vagrancy, disorderly conduct, or intoxication, by virtue of any instrument in the nature of a commitment, shall be received into this Prison, unless the commitment shall set forth that the defendant was *convicted* of the offence charged by the Magistrate signing the commitment, and sentenced in accordance with the Act of Assembly in such cases made and provided."

3. "No person legally convicted and sentenced for any felony or misdemeanor by any Court of Justice, (or by proceedings by any Magistrate,) shall be discharged by virtue of any instrument in the nature of a discharge, issued by such Court or Magistrate, unless by proceedings under a writ of *Habeas Corpus*, or a reconsideration of a sentence by the Court within a term in which the sentence is pronounced."

4. "In the cases of persons held to answer at Court, a discharge from the Committing Magistrate shall be considered valid prior to the 'return' of that case to Court, *Provided*, that the offence charged is not a felony, nor charged to have been done with the intent to commit a felony, and

Provided also, that the prosecutor shall have acknowledged satisfaction, and consented to such discharge."

5. "No prisoner, whose case may have been returned to Court, shall be released from this Prison unless by 'discharge' from the Court to which his case may have been returned, duly certified under seal of the Court by the proper officer thereof."

6. "No prisoner after conviction and sentence by a Court, shall be released from custody in this Prison, unless by virtue of a pardon from the Governor of the State under the great seal of the Commonwealth, duly certified by the proper officer of the Commonwealth, or upon the completion of the term for which he may have been sentenced, or upon a reconsideration of the case by the Court within the term in which the conviction was had and the sentence pronounced."

The usual attention to the moral and religious instruction of the prisoners has been paid during the past year. Religious services are held on every Sunday, and both the Visiting Inspectors and the members of the Prison Society, in their visits to individual prisoners, use fitting occasions for moral and devotional appeals. An appropriation of one hundred dollars was made for additions to the library.

On the eighth of April, 1869, Gerald J. Eaton was executed in the Prison yard, under sentence of death for the murder of Timothy Heenan. The execution was conducted by High Sheriff Peter Lyle, in strict accordance with the Act of Assembly, and in every respect with rigid propriety.

On the same morning, George S. Twitchell, Jr., under sentence of death, for the murder of Mary Hill, and left for execution on that day, was found dead in his cell. The evidence elicited on the Coroner's inquest, in his case, established the fact that his death had been produced by suicide with prussic acid at some period in the night after half past eleven o'clock. The ordinary vigilance in such cases had been practised, and there appeared to have been no special grounds for suspicion, especially as his religious adviser assured the keepers that "there was no danger" of such an attempt. The Board cannot but admit, however, that indiscreet laxity has prevailed in the cells of prisoners under sentence of death, and preparing for execution. More stringent rules are required as regards the admission of visitors, and greater watchfulness over the persons of the condemned is demanded. The visits, however, of near relatives can hardly be denied to the unfortunate men in their last extremity, and no vigilance can absolutely prevent their receiving concentrated poisons of small bulk, or afterwards using them.

Of the prisoners under sentence of death at the date of the last report, Hester Vaughan was pardoned by the Governor, 8th of May, 1869. Five convicts remain in the Prison under sentence of death, but indefinitely respite. Edward J. Ford, Patrick Farrigan, Jerrie Dixie, Newton Champion, and Alfred Alexander.

Since the overcrowded condition of the cells, escapes of convicts have been not unfrequent. In October last, the Board, having obtained the necessary appropriation from

Councils, appointed two Day Watchmen. No escapes have occurred since the entrance of these officers upon their duties, and they have broken up the conversation among the prisoners from the windows of their cells, which was habitually practised at certain hours of the day, and involved not only plans of escape, but details of past and projects of future crime. Intercourse between convicts and the bummers employed about the Prison has been thus also prevented.

The standard of health in the Prison during the year was good, and no epidemic of any kind occurred. Twenty-nine deaths are reported in the Untried Department from natural causes, viz., From mania-a-potu, 17; debauch, 9; congestion of the brain, 1; hematemesis, 1; pyemia, 1. In the Convict Department, there were thirteen deaths, twelve directly from consumption, and the thirteenth from hemoptysis, no doubt produced by a tuberculous condition of the lungs. The overcrowding of the cells has, doubtless, contributed to this increase of consumption. Of these deaths, there were six white males, six black males, and one black female. The mortality was 1.44 per hundred. Two cases of suicide occurred; one, that of George S. Twitchell, previously noticed; the other, by drowning, on the night of September 7th, the prisoner having been found dead with his head in a bucket of water.

The general administration of the Prison during the year was satisfactory. A faithful and efficient discharge of duty was generally observed. Many perplexing occurrences

broke the usually even tenor of discipline, and mistakes and omissions resulted. But, on the whole, the Board believes that the affairs of the Prison were well managed, and that its officers deserve commendation.

The Superintendent, Mr. W. B. Perkins, now a veteran in prison government, is entitled to a renewal of the expressions of confidence which he has heretofore received. And no less is to be said of the satisfactory discharge of duties by the Physician, Dr. H. Y. Smith; the Apothecary, Dr. B. F. Butcher; the Clerk, Mr. J. K. Howell, and the various officers in all departments.

Allusion has been already made to the useful and valuable services of the Agent, Mr. W. J. Mullen, whose duties have been performed in a manner eminently acceptable.

The Board refers with much regret to the death, on the 14th of November, after a lingering and painful disease, of Mrs. Ellen L. Spencer, who had, for more than fifteen years, been the Matron of the Female Department of the Prison. Mrs. Spencer was an able and efficient officer, a firm disciplinarian, but kind and humane, and, in the epidemics of sickness, especially typhus, which prevailed in the Prison, was most devoted, sympathizing, and self-sacrificing in her attentions to the sick. She was highly esteemed, and is deservedly lamented. The position of Matron, thus rendered vacant, has been conferred upon Mrs. Ann G. Ryan, long Assistant Matron, and Mrs. Ann Slover has been appointed Assistant Matron.

To their esteemed colleague, Joseph R. Chandler, Esq.,

the Board feels, that acknowledgments are especially due, for his devoted and invaluable services in the administration of the Prison.

It may not be uninteresting, in concluding the Report, to make a brief allusion to the mode adopted of compensating convicts for prison labor. They are charged a fixed sum, two dollars and a half each, per week, for maintenance, and are afterwards credited with work done, chiefly shoemaking, at fair rates. Of the balance earned over maintenance, each prisoner, on his discharge, receives one-half. No charge is made against him for maintenance during sickness, and all that are industrious may accumulate something. But even to those who have earned nothing, some little aid in money or clothing is always given, and individual charity is available for cases that fairly appeal to it.

The expenses of the Prison for 1869 were very slightly in excess of those for 1868, viz.: \$105,925 12, against \$104,635 63, for 1868. The profits of the shoe manufactory were \$3,872 95. The amount received from the United States Marshal, for the support of United States prisoners, was \$796 80. The estimated value of provisions, coal, &c., on hand, is \$9,513 25. The return to the City Treasurer of profits from the Manufacturing Department, was \$21,000 00.

The subjoined table furnishes a comparison of the expenses of the Prison for the last sixteen years:

Year 1854, there were 11,588 prisoners, costing \$78,288 18

PHYSICIAN'S REPORT.

*To the President and Members of the Board of Inspectors
of the Philadelphia County Prison.*

GENTLEMEN:—The Annual Report of the sanitary condition of the prison, for the year 1869, is herewith respectfully submitted. The annexed tables contain all the statistical information relating to the Medical Department. The report for the last year shows little or no improvement in the average condition of prisoners received, but presents a fair standard of health for the entire population of the prison. On the 31st of December, 1868, there were in the Untried Department three hundred and thirty-seven persons; received during 1869, eighteen thousand three hundred and five, making a total of eighteen thousand six hundred and forty-two; six hundred and thirty-eight more than during the previous year. Nineteen hundred and forty-eight prisoners were under treatment, as will be seen by referring to the monthly reports (besides thirteen miscarriages not mentioned in the tables,) in table No. 3, continued. Of this number we had twenty-nine deaths from natural causes, as follows: Debauch, 9; Mania-a-potu, 17; Congestion of the Brain, 1; Hæmatemesis, 1; Pyemia, 1. In addition to the deaths above named, we had two suicides, one on the morning of the 8th of April, by taking prussic acid, the other by drowning; this case occurred some time during the night of September 7th. The prisoner was found lying on his abdomen, the head in a bucket of water, and the end of his bunk placed on the back of his neck, no doubt for the purpose of assisting him in keeping his head under water. Both of these prisoners were charged with murder, the former was to be executed on the day he committed suicide, the latter had not been tried for the alleged crime. The deaths from natural causes may be traced, as usual, to a love for alcoholic stimulus and its effects; many of them were brought to prison in a dying condition, coming as they do from the lowest class of society, subject to every species of accident and disease, many of them died in a few hours after being sent from the station-houses to the prison, showing conclusively their condition when received by us.

The rates of mortality for all cases, as compared with the number of

prisoners, was sixteen-hundredths of one per cent., or thirty-one deaths out of eighteen thousand six hundred and forty-two prisoners. In this, the Untried Department, there were two births, both colored.

In the "Conviet Department" the amount of sickness during the year has been about the same, in proportion to the number of convicts, as it was during the preceding year; with the exception of the various forms of tubercular and scrofulous diseases; in this particular there have been a great increase.

The table of mortality for this Department shows thirteen deaths, as follows: No. 231, a black male died February 5; No. 3, a white male, February 21; No. 294, white male, February 29; No. 638, black male, March 7; No. 561, black female, March 10; No. 721, black male, April 7; No. 851, white male, April 13; No. 459, black male, May 10; No. 994, black male, July 27; No. 853, white male, August 3; No. 720, black male, August 16; No. 1251, white male, August 18; No. 548, white male, October 16. For further particulars in relation to deceased prisoners, see table No. 17, which gives color, sex, when committed, former health and habits, (as far as known,) time and cause of death. In nearly all of the cases named, their diseases were contracted prior to their imprisonment with us, and how far any former habits of intemperance and vice, or the restraint of confinement had in hastening their deaths, if any, is left to conjecture. The mortality per cent. was (1.44,) one and forty-four hundredths of one per cent., or thirteen deaths in a population of nine hundred and two prisoners. During the year 555 prisoners were discharged, as follows: white males, 407; black males, 92; white females, 41; black females, 15.

These discharged prisoners may be arranged in the following classes, in reference to their health on admission and discharge:

1st. Received and discharged in good health,	151
2d. " " in the same grade of imperfect health, 119	
3d. " " in better health than when received, 175	
4th. Discharged in worse health than when received,	97
5th. Died during the year,	13
	555

In conclusion, I am pleased to bear testimony to the cordial co-operation, of all the officers in the prison, in all measures designed to promote the health and improve the sanitary condition of the prison.

The following Table shows the number of Prisoners sentenced to hard labor, also the average number of deaths, and the mortality per centage annually, for the last twenty-three years.

YEAR.	Average number of Commitments.	Number of Deaths.	Mortality per cent.
1847	175	16	9.14
1848	160	13	7.50
1849	176	7	3.40
1850	154	8	5.12

* Removed from Walnut Street Prison.

† Removed from Arch Street Prison, where this fever was prevalent, and many of the inmates died thereof.

‡ Their disease was caused by masturbation.

The prisoner who died October 19, 1865, was under sentence of death, had been respite twice, and awaiting the action of the Governor.

No. 20.—General Statement of all cases of sickness among the Prisoners sentenced to hard labor in the Philadelphia County Prison for the year 1869.
